# Scenario 1: Domain WS-Central

Figure 1. Cancer centers / scientists are responsible for proposing new CDE concepts in the CDE development process. CDE administration is then carried out by a designated group from the respective workspace.
The final review, acceptance and harmonization is carried out by the Vocabulary and CDE (V/CDE) workspace, along with the NCI.
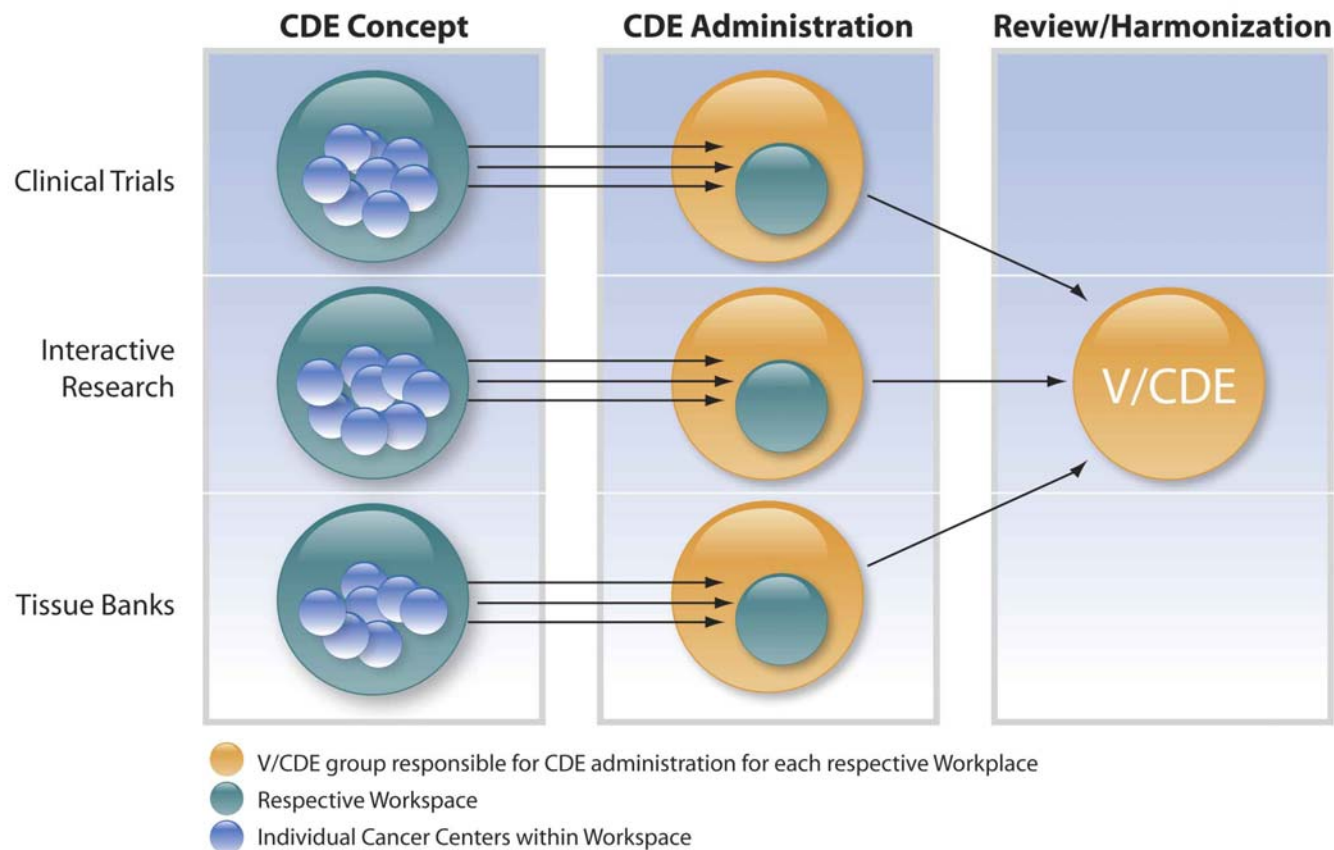

Scenario 2: Domain WS-Distributed

Figure 2. Cancer centers / scientists are responsible for proposing new CDE concepts in the CDE development process, as well as providing CDE administration. The final review, acceptance and harmonization is carried out by the V/CDE workspace, along with the NCI.
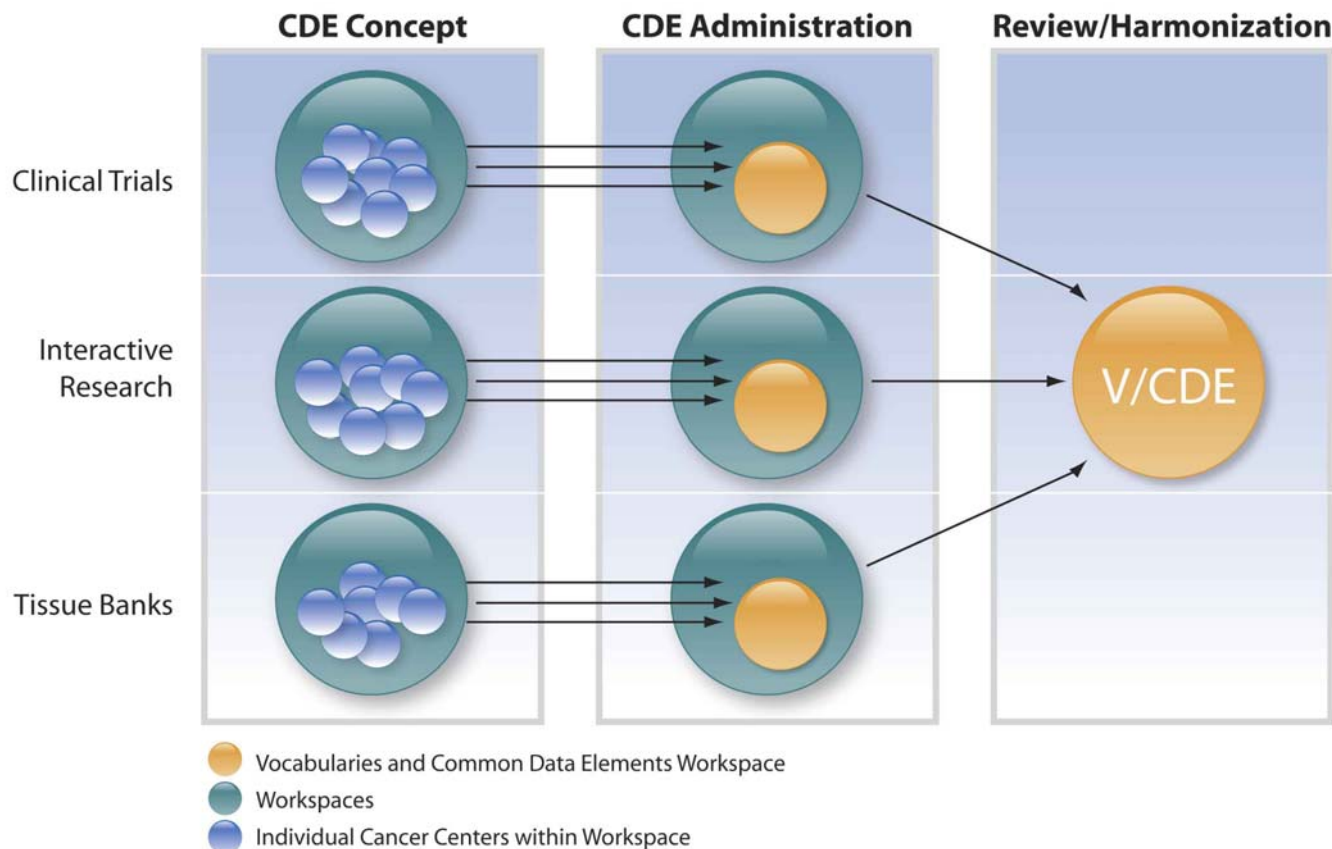

Scenario 3: V/CDE WS-Central

Figure 3. Cancer centers / scientists are responsible for proposing new CDE concepts in the CDE development process. CDE administration is then carried out by a designated group from the V/CDE workspace in cooperation with the respective Workspace. The final review, acceptance and harmonization is carried out by the V/CDE workspace, along with the NCI.

Scenario 4: Recommended CDE Development Model

Figure 4. Cancer centers / scientists are responsible for proposing new CDE concepts in the CDE development process. CDE administration is then carried out by a designated group from the respective workspaces, in conjunction with the V/CDE workspace. The final review, harmonization and acceptance is carried out by the Vocabulary and CDE (V/CDE) workspace, along with the NCI.
